REQUEST FOR PROPOSALS

Design and Installation of Sprung Maple Wood Floor

New Dance Alliance a New York City arts organization whose mission is to promote and support live experimental work in dance, music, and interdisciplinary forms. Seeks proposals to design and install a sprung maple wood floor at its rehearsal space located at 182 Duane Street in Tribeca. The studio is 23' x 32' with 10-1/2' wall height to ceiling. The usable size is 700 sq ft with no obstructions. We are currently seeking bids to upgrade our rehearsal space floor in September, 2006 to a resilient sprung dance floor system consisting of 25/32" x 2 1/4" maple flooring, 2" x 4" sleepers 9" O.C. 3/8 neoprene pads 12" O.C., and fire-retardant insulation between sleepers. The floor will need to be leveled with the removal and replacement of doors and construction of reducer. Please contact Karen Bernard by e-mail newdancealliance@nyc.rr.com or call 212-226-7624.

Deadline for responses: June 1, 2006 at 5:00 PM EST

dance → music → performance → video → convergence
